MVP

This MVP is a **Matka Betting + Result Control System** with **admin-controlled outcomes**, inspired by dpboss-style websites.
Important clarity

- **dpboss website** → *Result & information display*
- **Your system** → *Bet collection + admin result declaration + result display*

So we are building:

A **bet collection platform** + a **dpboss-like public result website**, where the **admin decides results manually** after seeing all bets.

🧠 2. UNDERSTANDING "DPBOSS GAMES" (FUNCTIONAL VIEW)

In dpboss / matka ecosystem, games are **formats**, not algorithms.

Common game types (MVP relevance)

Game Type	Meaning	MVP Status
Single Ank	One digit (0–9)	✅ MVP INCLUDED
Jodi	Two digits (00–99)	🔶 Visible, MVP+
Single Patti	3-digit set	🔶 Visible, MVP+
Double Patti	Double digits	❌ Later
Triple Patti	Triple digits	❌ Later
Half Sangam	Combination	❌ Later
Full Sangam	Combination	❌ Later

👉 **MVP RULE:**
Only **Single Ank (0–9)** is ACTIVE.
Others can be shown as **coming soon / disabled**.

👤 3. USER REQUIREMENTS (MVP)

What a USER can do

1. Register / Login (basic)
2. Select:
    - Date (auto)
    - Market (Main Bazar Day, etc.)
    - Game type (Single Ank only)
3. Enter bet:
    - Digit: **0–9**
    - Amount: **custom input (₹0 – ₹100000)**
    - Optional multiplier: **2x, 4x, 8x, 10x**
4. Submit bet
5. View:
    - My Bids
    - Bet History

What USER CANNOT do

❌ Cannot see total bets
❌ Cannot see result logic
❌ Cannot influence result
❌ Cannot see other users' bets

🔁 4. USER FLOW (STEP-BY-STEP)

User Login

↓

Select Market & Date

↓

Select Game (Single Ank)

↓

Select Digit (0–9)

↓

Enter Amount (or use multiplier)

↓

Submit Bet

↓

Bet Saved → Visible in My Bids

↓

Wait for Result

No winning/losing calculation shown to user in MVP.

🛠️ 5. ADMIN REQUIREMENTS (MOST IMPORTANT)

Admin has FULL CONTROL

Admin capabilities:

1. Login (secure)
2. View **all bets**, aggregated
3. View bet totals **digit-wise**
4. Decide **winning number manually**
5. Declare result
6. Publish result to public site

🔐 6. ADMIN FLOW (STEP-BY-STEP)

Admin Login

↓

Select Date & Market

↓

View Bet Summary (0–9 totals)

↓

Analyze lowest / preferred number

↓

Select Winning Digit

↓

Declare Result

↓

Market Locked

↓

Result Published

Key rule

Admin decision overrides everything

No automation in MVP.

📊 7. ADMIN DASHBOARD (MVP SCREENS)

A. Bet Summary Screen

For selected market & date:

Digit	Total Amount
0	₹45,000
1	₹12,000
2	₹78,000
3	₹8,500 ←
4	₹34,000
5	₹22,000
6	₹19,500
7	₹40,000
8	₹15,000
9	₹28,000

Admin **chooses any digit**, not necessarily lowest.

B. Result Declaration

- Select digit
- Confirm
- Result saved & locked

🌐 8. PUBLIC RESULT WEBSITE (DPBOSS-STYLE)

This is a **SEPARATE FRONTEND**.

What it shows

- Today Lucky Number
- Market Results
- Final Ank
- Static dpboss-like content
- CTA buttons (WhatsApp / App)

What it DOES NOT do

❌ No betting
❌ No user login
❌ No calculations

It **only displays admin-declared results**.

🔄 9. COMPLETE SYSTEM FLOW (END-TO-END)

USER places bet

↓

Bet stored in DB

↓

Admin sees aggregated bets

↓

Admin declares result

↓

Result stored in DB

↓

Public website fetches result

↓

Users see final number

🗄️ 10. DATABASE (MVP-LEVEL)

Users

golden_ank

final_ank

🧩 11. MVP BOUNDARIES (VERY IMPORTANT)

INCLUDED

✅ User betting
✅ Custom amount + multipliers
✅ Admin bet summary
✅ Manual result declaration
✅ dpboss-style public result site

EXCLUDED (INTENTIONALLY)

❌ Wallet & balance
❌ Payment gateway
❌ Auto result logic
❌ Profit/loss calculation
❌ Agent hierarchy
❌ Payout distribution

These come **after MVP validation**.

⚙️ 12. RECOMMENDED TECH STACK (MVP-SAFE)

Backend

- **Python FastAPI**
- REST APIs
- JWT Auth

Database

- PostgreSQL (Render)
- OR MySQL

Frontend

- User App: React / Next.js
- Admin Panel: React
- Public Site: React / HTML

Hosting

- Backend → Render
- Frontend → Vercel / Netlify

⏱️ 13. MVP TIMELINE (REALISTIC)

Module	Days
Backend APIs	2
User Betting UI	2
Admin Panel	2
Public Result Site	1
Testing & Fixes	1

⏱️ **Total: ~8 days**

📜 14. ONE-PARAGRAPH CLIENT-READY SUMMARY

"We will build an MVP where users can place Matka bets by selecting a number and amount. All bets are collected and shown to the admin in a summary dashboard. The admin will manually decide and declare the winning number. Once declared, the result will be instantly displayed on a dpboss-style public result website. The system is fully admin-controlled and designed to be extended later."
